DID YOU KNOW?

Practices and providers can "pick their pace" in 2017 for MIPS reporting?

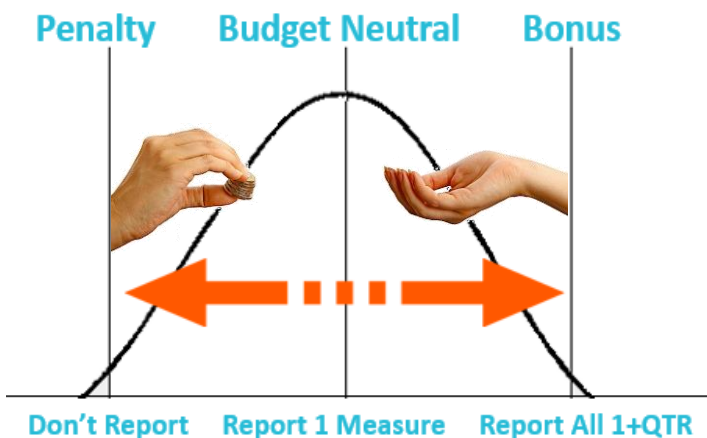

Merit-based Incentive Payment System

MIPS is the path most Medicare physicians will initially participate under the Quality Payment Program (QPP) which is being called the "Modernization of Medicare" and, in many ways, is expected to be a much better program than the programs it replaces such as PQRS, Meaningful Use, and Value-based Modifiers.

For practices and providers, 2017 is an advantageous year to get started as the reporting options are flexible in this first year of the program. MIST offers strategic planning to get you started and actively aids you through the process to the finish.

STEP #1: Determine eligibility. If you bill Medicare more than \$30,000 in Part B allowed charges a year and provide care for more than 100 Medicare patients a year, then you are in the program.

STEP #2: Determine if you are an eligible clinician, these include:

- Physician
- Nurse practitioner
- Physician assistant
- Clinical nurse specialist
- Certified registered nurse anesthetist

Our Certified MACRA-MIPS Quality Professionals are here to help! For assistance call **1-877-874-6475 x104** or Email: mips@mist-corp.com.

DID YOU KNOW?

MIPS is a budget-neutral program? 2017 is an **8% swing from a -4% to +4% payment adjustment** beginning in 2019.
